**Port Orange, FL 32129**

## Objective:

To expand my I.T knowledge with applied industry experience and to strengthen my background knowledge so that it aids in my endeavor to become proficient in cloud technologies.

## Experience:

**Serverless Web Application:**                                    **2018**

School project.  I created a completely serverless equipment booking form page within AWS.  I used Lambda, API Gateway, DynamoDB, Simple Notification Service, Simple Email Service (SES) and Auth0 for account logins.

HomeLab Studios

**Mobile Game Designer/Developer:**                          **2012 - 2013**

Designed and developed the Android mobile app Bash an Alien, a whack-a-mole style mobile game.  Developed in **C**++ using the cross-platform Marmalade SDK.  I was responsible for the entire project from concept to release.

## Education:

**Bachelors of Science in Multimedia, Technology, and Design.**        **2008 – 2011**

❖ Brunel University

**A.S Computer Programing and Analysis.**                      **2015 – 2018**

❖ Valencia College

(acloud.guru) AWS Associate Solutions Architect                  2018 – Present

## Skills

**Programming –** HTML, CSS, JavaScript, jQuery, **Java**, C, C++, Python, PHP, Git, GitHub

**Amazon Web Services (AWS) –** EC2, Load Balancing, Autoscaling, VPC's, Lambda, Serverless, CloudFormation.

**Knowledge of object orientated languages** – Designing, creating classes and implementing them.  Making use of existing API's.  UI design.

**Self-taught** most of the languages.
